# Symfony/php storm

JavaScript

```javascript
24  bot.on(Events.InteractionCreate, async interaction => {
25      if (!interaction.isModalSubmit()) return;
26
27      if (interaction.customId === 'Rappel') {
28
29          await interaction.reply({content: "Le rappel a bien été enregistré :thumbsup:", ephemeral: true })
30      }
31
32      const dateRappel = interaction.fields.getTextInputValue('dateRappel');
33      const sujetRappel = interaction.fields.getTextInputValue('sujetRappel');
34      const recurrence = interaction.fields.getTextInputValue('recurrence');
35      const userId = interaction.user.id;
36
37      console.log(dateRappel, sujetRappel, userId, recurrence);
38
39      const api = axios.post('http://127.0.0.1:8000/api/reminders',
40          {
41              type: "rappel",
42              message: sujetRappel,
43              date: "2023-02-17 11:07:00",
44              recurrence: "hebdomadaire",
45              userId: "tata"
46          },
47          {
48              headers:
49              {
50                  'Authorization': 'Basic Ym90OmJvdA=='
51              }
52          }
53      )
54
55      const user = await bot.users.fetch(userId);
56      user.send(sujetRappel);
57  });
```

```javascript
11  async run(bot, interaction) {
12
13      // Create the modal
14      const modal = new ModalBuilder()
15          .setCustomId('Rappel')
16          .setTitle('Rappel');
17
18      // Add components to modal
19      // Create the text input components
20      const dateRappel = new TextInputBuilder()
21          .setCustomId('dateRappel')
22      .setRequired(true)
23          .setLabel("Date rappel au forma (yyyy-mm-jj hh:mm:ss)")
24          .setStyle(TextInputStyle.Short);
25
26      const sujetRappel = new TextInputBuilder()
27          .setCustomId('sujetRappel')
28      .setRequired(true)
29          .setLabel("Sujet de rappel")
30          .setStyle(TextInputStyle.Paragraph);
31
32      const recurrence = new TextInputBuilder()
33          .setCustomId('recurrence')
34      .setRequired(true)
35          .setLabel("Recurrence (aucune,journa,hebdo,mensuel)")
36          .setStyle(TextInputStyle.Short);
37
38      // An action row only holds one text input,
39      // so you need one action row per text input.
40      const firstActionRow = new ActionRowBuilder().addComponents(dateRappel);
41      const secondActionRow = new ActionRowBuilder().addComponents(sujetRappel);
42      const thirdActionRow = new ActionRowBuilder().addComponents(recurrence);
43
44
45      modal.addComponents(firstActionRow, secondActionRow, thirdActionRow)
46      interaction.showModal(modal)
47  }
48 }
```
